INTERNATIONAL STEP-DOWN AUTO TRANSFORMERS - CONTINUOUS DUTY

220/240 Volt Input - 110/120 Volt Output 50/60 Hertz

Convert American Appliances And Equipment For Use On Foreign Voltages

These step-down transformers are supplied with European "SCHUKO" CEE 7-7 plugs and NEMA 5-15R (15 ampere 125 volt) receptacles. Adapters can be used to convert the line cord plug to other foreign receptacles or the plug can be removed and replaced with the appropriate foreign plug. Auto transformers change voltage levels only and not frequency (Hertz).

SELECTING THE CORRECT SIZE AUTO TRANSFORMER

Determine equipment ampere usage then multiply amperes by the equipment's operational voltage which equals watts(VA).

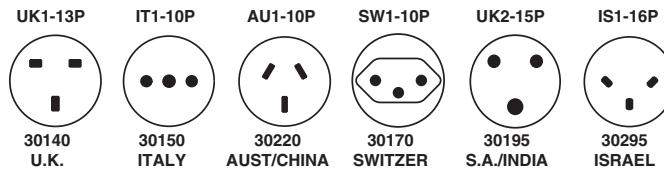

EXAMPLE 3.6 amperes x 120 volts = 432 watts

Select a 500 watt or larger transformer for this requirement.

Auto transformers change voltage levels and not frequency from 50 to 60 cycle (hertz) or vice versa. Appliances using synchronous motors should have the motor designed for the specific frequency if motor speed is critical for proper operation of the appliance or equipment. **NOT** recommended for use with refrigerators. Contact sales office for refrigeration type transformers.

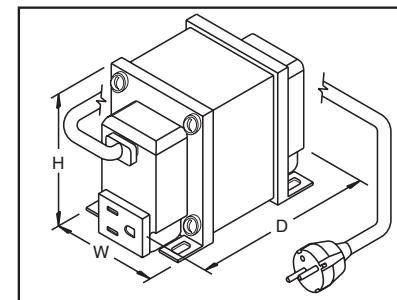

NOTE: When using a transformer with more than one appliance at a time, the total wattage of all appliances used together should not exceed the maximum rated watts of the transformer.

ADAPTER OPTIONS: Use these adapters to convert the "SCHUKO" CEE 7-7 power supply cord plug to a different plug configuration.
